

Eating right, Blood Type AB

The following lists of foods are summary of the excellent work done by Dr D'Adamo, in his latest book, "Live Right For Your Type" and includes update information regarding "Secretor Status", an important clinical distinction when it comes to food selection.

Consider the "**Secretor**" (around 80% of people) as a person with their blood type, and thus their immune components, expressed throughout their body fluids, like a well guarded facility with a security fence and guard dogs, designed for all sorts of possible attacks.

In contrast consider the "**Non-Secretor**" as the more primitive or simplistic immune system, with its components present in the blood. The analogy would be a burglar alarm inside your house, when it goes off you are already in trouble, and the battle for survival may be expensive with the home invasion hard to reverse.

In life we find the non-secretor less able to cope with the modern existence of chemicals, high carbohydrate consumption and man-made bugs and viruses. Chronic fatigue, endocarditis (inflammatory infection of the heart), hypersensitivity to chemicals and foods, alcoholism, and diabetes are more common with non-secretor group.

If you don't have a history of the above you can presume yourself to be a SECRETOR until further testing determines otherwise.

The following lists apply to the "**Type AB Secretor**". To find out your secretor status you will need to order the saliva test kit from the web site at www.dadamo.com and follow the instructions.

To maintain Acid/Alkaline ratios a 70% fruit and vegetable based diet daily should be attained with a close to 80% for the A blood type.

If you want to recover from poor health, eat largely from the Highly Beneficial sections and supplement from the Neutral only. If you don't yet know your secretor status, it is advised that you order the saliva test.

Foods that encourage Weight Gain

Red meat, Kidney beans, Lima beans, Seeds, Sweetcorn, Buckwheat, Wheat

Foods that encourage Weight Loss

Tofu, Seafood, Green Vegetables, Kelp, Dairy Products, Alkaline Fruits, Pineapple

Easy Reference Guide to Healthy Eating Blood Type AB, Secretor

TYPE / FREQUENCY	EXCELLENT	OK	NO NO and NO
